

# Wendy's Frosty slips away

Written and Designed By Alivia Harrell '25

If you want a quick, cold dessert to enjoy, Wendy's is one option you could go to, to indulge your taste buds. The fast food restaurant, Wendy's, offers frostys, which is ice cream in a cup that comes in two different flavors, (light) chocolate and vanilla. Wendy's has different sizes for you to choose from as well, such as Junior, Small, Medium, and Large.

Some of the prices aren't a great deal, but, Wendy's offers a key tag for \$2. The key tag is good for a free Jr. Frosty with any purchase for a whole year. One negative aspect about the Frosty, is that the Frosty lacks flavor. The "light chocolate" flavor is a combination of chocolate and vanilla, not just chocolate. You can't taste the chocolate as much, unlike other types of ice creams, like Turkey Hill ice cream. Turkey Hill ice cream has rich flavor in all types of flavors they produce. Oftentimes I dip Wendy's fries in the frosty, as a way to further accentuate the flavor.

For all these reasons, I would rate Wendy's Frosty a 7/10 because it is convenient to buy, but the prices and flavor aren't exceptional.
